

Updates on Meet up with SA

Student lounge is closed!

Some of us met up with Tiffany on Saturday and here is a brief of the meeting discussion:

The lounge initially set up by OCD to be a place where student can relax. Random checks informed OCD that the place was not utilized for its original purposes therefore they decided to close it down and create another use of the space.

SMUSA steps in....

With much effort, SMUSA created a proposal to turn the place into a clubhouse so that it can be given to students. SMUSA aims for the new clubhouse to be a place where students and play and relax with light music in the background. They assured us that it will be definitely different from Frujch.

The delay in the re-opening was caused by some administrative issues (such as funding, contractors etc). SMUSA is looking into resolving these issues very soon and that work will resume soon.

Keeping student body informed...

There was a lack of information provided to students. SMUSA has been informed of it and they have agreed to keep students regularly updated about the progress of the work because we all care. J

Our concerns.....

We have conveyed to SMUSA that the place has a natural culture formed. It offers a ambience where no other parts of the school did. Though the space was intended to be a relaxing place, it does have demand from students as a place to study and discuss work. Therefore SMUSA has been kindly asked to take into consideration these actual demands of the students and convey this to the management.

So what now....

We all ought to appreciate SMUSA's efforts. We will wait for the new clubhouse. Studying will be discouraged in the new club house. We trust SMUSA has heard our true concerns and will do their best to address them.

Peek 'look' at the new club house...

We hear that it will have a stage for performances, sofas and coffee tables for discussion. And dining tables for food and work. Also there will be a student vendor to meet to our demands of delicious snacks and meals J
